

TA 0163 - e4 Hot Model 'Safety Shield' Control Button Lock Feature

Instructions for enabling/disabling the optional safety lock feature for cold dispense buttons on e4 'hot' models:

Important:

- All new units/replacement HMI button control boards are supplied defaulted to disabled.
- Changes to the lock status can only be carried out within 10 mins of switching the unit on or following a power re-boot/re-start, after which the available window times out.
- Familiarise with the instructions before continuing.

To enable:

1. Press and hold the 'Lock' button for 5 secs, until receiving a single confirmation bleep.
2. Within 2 secs, repeat the above step (1) a further twice, meaning a total of three sequences carried out. Upon the final (3rd) press of the 3rd sequence, await a long double bleep, confirming the feature is enabled.

To disable:

3. Press and hold the 'Lock' button for 5 secs, until receiving a single confirmation bleep.
4. Within 2 secs, repeat the above step (3) a further twice, meaning a total of three sequences carried out. Upon the final (3rd) press of the 3rd sequence, await a long single bleep, confirming the feature is enabled.
